HOW DO I SECURE MY DATA?*

Phishing and hacker attacks on computers are daily business. Lucky, who has not been hit yet! Firewalls, safe passwords, a careful view on mails and links, combined with suspicion for any incoming files are a good way to prevent your data. But also insurance helps save you money in case of viruses and other problems. Let us know how we can help! // [Andre Reimold](#)

> Winter storage

EVERYTHING COVERED WELL?

Your yacht is safe and well insured while in winter storage, no matter if in the water, on land or in a covered winter storage place. Now it's the time for preparing everything for the winter months, and we have a few reading recommendations for you:

<https://www.schomacker.de/tipps-zum-einwintern.html>

<https://www.yacht.de/diy/pflege/ratgeber-einwintern-gut-vorbereitet-in-den-winter/>

Unfortunately, with the winter season the numbers of fire damages in winter storage are rising. In case of a fire in a storage hall, often many boats are damaged. So please check your incontestable fixed value! Is the sum still correct? Costs for wreck removal and rescue are of course covered by our clauses. Please inform also your neighboring boat owners of the importance of a high quality yacht insurance. // [Volker Reichelt](#)
